Subject: follow-up Re: DCA: Re: 9/11 data and the DVRS Reproducer
(UPDATE) 

Hi Bob/Donnie, I spoke to Joanie Weston and she tells me that she already has all 9/11 data on DATS, so there is no reason to save it on the hard drive. Currently, her hard drive can not handle this storage of information, and is deleting other hard drive data, therefore it must be removed.

I advised her to make sure that everything stored on the hard drive is already saved on the DATs.

Subject: DCA: Re: 9/11 data and the DVRS Reproducer (UPDATE)

Good morning. Freddy & I discussed this, and it appears that as long as the data has been successfully transferred to DATs, the original data may be removed from the hard drive. Freddy will be in today by 11 am, and he will confirm this for you.

Please take no action to change the existing setup, for now. We are aware of this problem now, and

will have an answer for you by Tuesday morning. Thank you.

Subject: 9/11 data and the DVRS Reproducer

Hi Bob,

Please see Joanie's message. Can you provide us with an answer to her question?

Donnie

Subject: 9/11 data and the DVRS Reproducer

Donnie,

Per our conversation yesterday...I have all of DCA 9/11 files saved to the hard drive of the reproducer. These files are taking up a lot of hard drive space on the reproducer. I have them all locked onto the reproducer. However, with the number of tapes I listen to, other files are being deleted as I add new ones due to reduced hard drive space. I have the 9/11 DAT tapes in the 9/11 file. My question is whether or not it is ok to delete these files off the reproducer and just retain the DATS? Please let me know.

Thanks,

Joanie Weston
